

SC 40RH

Scanjet tank cleaning equipment

KEY FEATURES

SC 40RH

- Strainer standard
- Integration with WashTrac™ (option)
- Drive unit can be removed without exposing tank to atmosphere
- No gearbox inside tank
- AISI 316 and PTFE
- Grease lubricated

Scanjet Model SC 40RH is a robust and very flexible type of tank cleaning machine specially designed for marine and off-shore applications. Scanjet Model SC 40RH is hydraulic driven with an integrated drive unit.

Twin nozzle tank cleaning machine

The SC 40RH gives the user the possibility to optimize the cleaning operation and is preprogrammed to minimize the use of time, energy and cleaning media.

SC 40RH has very few moving parts requiring a minimum of service and is maintenance free inside tank.

Adjustable rotation speed

The rotation speed can easily be adjusted on the driving unit.

Typical applications for SC 40RH

- Chemical carriers
- Product carriers
- Offshore applications
- River barges
- Deck tanks
- Recidual tanks
